

HI-FOG® five star fire protection

The HI-FOG water mist fire protection system protects your hotel with a single system.

With one system, installation, operation and maintenance are simple.

When designing a new hotel, selecting HI-FOG will help you save space, which leads to new business opportunities and decreases your overall building costs.

Optimized sprinklers and spray heads for your needs

A HI-FOG® system can include:

- Sprinkler heads
- Spray heads
- Tubina
- Valves
- Pump units
- Water supply
- Hose reels

Sustainability and the environment matter

The HI-FOG system stays in standby mode most of the time, at low power consumption.

Environmental impacts of the system's periodical testing and discharges are non-existent – HI-FOG uses only pure water.

Safeguarding over 200 hotels globally

Keeping your people safe and business up and running, while valuing your hotel's unique characteristics has driven our team of specialists forward for more than 30 years.

We have the expertise to design, manage and service fire suppression systems for retrofit and newbuild hotels.
